Laboratory Services

Laboratory Services

At SMC, laboratory testing is a key part of our comprehensive care.

Our laboratory professionals – medical technologists/histologists – perform moderate to high complexity lab testing. Approximately 70 percent of all diagnoses at SMC are based on laboratory results. This data affords our physicians the means to provide appropriate treatments from routine screenings to complex diseases. SMC undergoes accreditation every two years by The Joint Commission. Our medical technologists have a minimum of a bachelor's degree with an ongoing accreditation with the American Society of Clinical Pathologists.

Our laboratory offers Molecular PCR COVID-19 testing. Results are available in less than 48 hours.

We offer an extensive menu of diagnostic procedures in the following areas:

- Anatomic Pathology
- Blood Bank
- Blood Gases
- Clinical Chemistry
- Hematology/Coagulation
- Microbiology
- Phlebotomy
- Toxicology
- Unanalysis

Accreditations

Our laboratory is accredited by The Joint Commission and licensed by the New Jersey Department of Health. This means we are held to the highest quality and safety standards and assures our patients and physicians that the results we produce are accurate.

Convenient Testing

We have made outpatient testing convenient by offering multiple sites. Our experienced phlebotomy staff is friendly, courteous and proficient. Specimens are delivered and tested at the hospital laboratory. No appointments are necessary at any of our collection sites.
